PROFESSIONAL SUMMARY

- Software Developer with 3+ years of backend engineering experience including production-level development, internship, and open-source projects.
- Proficient in Python, FastAPI, PostgreSQL, and vector search with pgvector/Qdrant. Passionate about scalable and AI applications.

EDUCATION

B.Tech, Computer Science and Engineering

Dr. A.P.J. Abdul Kalam Technical University, Ghaziabad

Sept 2020 – Sept 2024

Summer School on Digital Platform

Aalto University, Helsinki, Finland

Aug 2023

EXPERIENCE

Software Developer

Aveti Learning Pvt. Ltd.

July 2024 – Present

Bhubaneswar, India

- Engineered secure backend for a US client **Dignifi**, helping ex-prisoners access housing, education, and jobs.
- Developed Info-Search backend in FastAPI and PostgreSQL with vector embeddings, indexing 100K+ content items.

Software Development Intern (Part-time)

Aveti Learning Pvt. Ltd.

Jan 2021 – June 2024

Remote

- Built **Smart Class App** (PyQt) for 1400+ schools in Odisha for offline smart board content delivery.
- Developed PPT-Translation backend (Flask + MySQL) used by 1200+ teachers for content review.
- Indexed 140K+ media files using pgvector + embeddings for Document Management System.
- Created offline e-library system for Raspberry Pi used by 600+ rural students.

PROJECTS

PyWhatKit

GitHub

- Authored a popular Python automation library with **2.5M+ downloads**, featuring WhatsApp scheduling and Google searches.

Deep-Live-Cam

GitHub

- Contributed a Mac build fix to this **70K-star** deepfake tool, enhancing cross-platform support.

Other Projects

GitHub

- **HomeworkMachine**: Converted typed text to handwriting using OpenCV; about 10K users.
- **PhotoCluster**: Clustered mobile photos using KMeans and Qdrant vector search.
- **Clipry**: Electron-based clipboard manager for Linux with quick search.

SKILLS

- **Languages**: Python, Go, NodeJS, SQL, NoSQL
- **Frameworks & Libraries**: FastAPI, Flask, Django, Kafka, RabbitMQ, Express, Electron, PyQt
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis, Qdrant
- **Tools & DevOps**: Docker, Git, GitHub, Heroku, Linux, Raspberry Pi, Kubernetes
- **Concepts**: Vector Search, Embeddings, RAG, JSON, YAML, REST APIs, OSS

ACHIEVEMENTS & CERTIFICATIONS

- Won **1st Prize** in Hackathons at ADGITM IPU and DTU during college.
- Selected for **Finland Summer School** trip by Aveti Learning as a reward for hardwork.
- Got a **Job Offer** in the current organization for developing PyWhatKit
- **AI Agents Fundamentals** – HuggingFace
- **Redis AI, Vectors, Streams** – Redis University
